

HDMI Switch
4 in 1 out

Plug and play operation

HDMI 4 inputs 1 output

Only AWG 26 required

Up to 4K Ultra-HD

Dolby Master DTS-HD

Monitor adaptability

DC 5V 1A power supply

One HDMI Source to Four Ultra-HD Displays by AWG 26 HDMI Cable, 4K/60Hz with IR remote control

Good compatibility

The HDMI splitter boasts HDMI 2.0a compatibility, 3D support, and can handle the highest video resolution of 4K at 60Hz. It efficiently manages data rates of up to 6Gbps for TMDS clocks up to 600MHz, allowing for crisp, high-quality images. With support for 24/30/36 bit deep color, it ensures vivid and accurate color representation. The device accommodates various cable lengths, supporting standard AWG26 cables for up to 8 meters in both input and output for resolutions up to 4K/30Hz, and standard HDMI 2.0 cables for up to 3 meters in input and up to 5 meters in output for 4K/60Hz. Additionally, it requires a DC5V/1A power supply to operate effectively, offering seamless connectivity for single or high-definition displays across multiple sources such as DVD players, satellite receivers, HD players, PS4, and set-top boxes.

Easy To Use Easily

The 4x1 HDMI switch offers a plug-and-play solution, allowing for easy setup and use without the need for complicated configurations or installations. Simply connect your HDMI devices to the switch, plug it into your display terminal, and you're ready to go.

Use cases

- Connect your Set-Top Box (STB), DVD player, PlayStation (PS), and PC to the HDMI output using good HDMI cables. Each device can plug into any of the three input ports on your display or receiver.
- Connect the HDMI output port to your display's HDMI input port. Use an IR remote to switch between different sources connected to the HDMI output port.
